- Certified EPA Lead Renovator
- Limited Lifetime Warranty†
- Exclusive 30-Day Price Protection Guarantee
- Licensed, bonded, and insured
- Customers are always protected by Window Nation's insurance policy for \$2,000,000

WINDOW SPECIFICATIONS

OUR WINDOWS WILL ENHANCE YOUR HOME WITH SUPERB STYLE AND YEAR-ROUND COMFORT

EdgeForce makes a statement of style with its low-profile frame and sash, creating an expanded glass area. At the same time, internal chambers increase structural integrity, rigidity and energy efficiency.*

CoreFX innovative composite reinforcement allows for secure mounting of hardware and the low-conductive material helps reduce the transfer of energy.¹

Defense-Tek's end-of-throw cam shift locking action delivers increased strength and protection. The low-profile design includes a "locked" indicator that tells you if your windows are left unlocked.

Smooth and uniform, **Forecaster** quickly directs water runoff without the use of weep holes, keeping the exterior of the window clean and attractive.²

Our **HP3** telescoping sill dam delivers a triple payoff: protection from air and water infiltration, increased structural stability and enhanced beauty.

The **ClimaTech® ThermD Spacer System** features a stainless steel alloy and patented U-shaped design that creates a superior insulating barrier and helps prevent the transfer of heat at the edge of the glass to reduce condensation.

When harsh wind and weather hit, **Gatekeeper** stands strong. Traditional sloped sill designs can allow the sash to bow during powerful winds, but with Gatekeeper interlocking sash-to-sill technology, the sash is channeled firmly into the window frame for a unified wall of strength.

The **Ocular** compression bulb seal creates a snug fit that helps prevent light penetration between the screen and frame. It also aids in easy screen installation and removal.³

PLUS, THESE ADDITIONAL FEATURES:

- Fully fusion-welded frame and sash corners create superior strength and a clean, low-profile finished look.
- Dual-pane, double-strength glass increases strength, durability and insulation.
- Airtight insulating chambers enhance thermal performance and durability.
- Multi-layer weatherstripping helps block energy loss and protects against inclement weather.
- Dual vent stops for limited and convenient opening of the window for ventilation.
- Hidden screen track creates a clean-line design for enhanced visual appeal; half screens are standard, optional full screens also are available.
- For an enhanced appearance and ease of installation, four additional frame options are also available; 1" set back nail fin, 1-3/8" set back nail fin, 1-3/8" set back nail fin with j-channel adaptor and stucco fin (block frame standard).

Optional insulation-enhanced technology takes energy efficiency to a higher level of performance. This innovative system features carbonized foam liners in the window structure to deliver greater thermal protection year-round. (Available in the ENERGY STAR Northern climate zone only.)

¹Double-hung base model will automatically be upgraded to ST (steel reinforcement) for all units ordered in excess of 48" wide or 84" high.

²For larger size windows or to meet specific DP/PG ratings, optional weeps/performance package must be ordered.

³Available only with the full screen option.

HIGH-PERFORMANCE ENERGY GLASS

ENERGY-EFFICIENT INSULATED GLASS

For most homeowners, lowering fuel costs for heating and cooling is a key motivation for purchasing new windows. Windows are roughly 80% glass, so it's important to choose the best glass system for your home and specific climate conditions. Bellevue Windows are built with a dual-pane insulating glass unit^{††} with double-strength glass. Upgrading your windows with a Low-E (low-emissivity) glass system will further enhance the overall energy efficiency. Low-E glass features a virtually clear, metallic coating that acts as a thermal mirror, reflecting radiant heat back into your home during winter and reducing unwanted solar energy in the summer.

HIGH-PERFORMANCE CLIMATECH THERMD SPACER TECHNOLOGY

For strength and durability that transcends all others – ClimaTech ThermD Intercept® Stainless Steel Spacer is one of the premier choices. You may not realize it, but a window's spacer system is a key component to its overall quality and performance. ClimaTech ThermD features an advanced design that stabilizes the panes of glass and creates a strong moisture barrier, while increasing the window's structural integrity and thermal performance.

The ClimaTech ThermD Spacer is expertly constructed to stand up strong to harsh wind and weather as well as heavy-duty wear and tear. When you compare the stainless steel alloy construction to other spacer systems made of aluminum or foam, you'll see why ClimaTech ThermD takes the lead in superior strength, longevity and resistance to corrosion.

BELLEVUE WINDOWS MEET STRINGENT ENERGY STAR® REQUIREMENTS

Superior quality with outstanding affordability – Bellevue Windows meet or exceed stringent ENERGY STAR requirements and are certified and verified for energy-saving performance. The dual-pane unit with double-strength insulated glass, energy-engineered frame and sash and low-conductive composite reinforcements will protect your home from challenging weather and promote energy efficiency.

With conventional aluminum spacers, the sealant flexes, which can lead to sealant failure and loss of insulation performance. With the ClimaTech ThermD Spacer, IG units (insulated glass) flex instead of the sealant, thus resisting spacer movement and sealant failure.

Bellevue Windows and Window Nation Patio Doors are available with a variety of glass options. Your Window Nation Sales Representative can help you choose an energy-efficient glass package to meet the ENERGY STAR requirements for your home and climate zone.

DOUBLE-HUNG

DOUBLE-HUNG WINDOWS

Bellevue Double-Hung Windows combine modern technology with timeless appeal. The energy-tight construction, handsome detail and easy operation take this window from functional to fantastic.

- Narrowline frame and sashes with fusion-welded corners for exceptional beauty, strength and energy efficiency.
- Integrated sash-to-sill interlock provides a unified wall of strength; helps prevent the sash from bowing in harsh winds.
- Low-conductive composite reinforcement in the meeting rails is designed for secure mounting of hardware and energy efficiency.
- True sloped sill creates a highly efficient drainage system to help inhibit water and debris accumulation.
- Constant force balance system provides smooth raising and lowering of sashes.
- Hidden screen track for a neat, clean appearance.

Both sashes on the double-hung window tilt in for easy cleaning.

These two-lite sliding windows feature a Single Prairie grid pattern for a subtle touch of style.

SLIDING WINDOWS

A generous glass area complements the sleek yet strong mainframe and sashes of the Bellevue Sliding Window. You'll enjoy the ample infusion of warm, natural light along with an unobstructed view of the outdoors.

- Narrowline frame and sashes with fusion-welded corners for exceptional beauty, strength and energy efficiency.
- Insulated glass unit with double-strength glass and ThermD Spacer System provides thermal protection and longevity.
- Embedded, multi-chambered construction creates airtight insulating compartments for enhanced thermal performance and strength.
- Low-conductive composite reinforcement in the meeting rails is designed for secure mounting of hardware and energy efficiency.
- Nylon-encased dual brass roller system for easy-glide performance.
- Hidden screen track for a neat, clean appearance.

Contoured grids in a Colonial pattern add architectural detail to the end units of this three-lite sliding window.

CASEMENT WINDOWS

Caseмент windows seamlessly merge traditional elegance with state-of-the-art technology. An updated slimline style enhances the charming appeal with an easy-touch crank handle in low-profile nesting hardware.

- Exterior sash design creates the appearance of a larger glass area with an attractive slimline look.
- Heavy-duty hinge system allows a wide sash opening for easy cleaning from inside the home.
- Positive crank mechanism permits easy operation when opening and closing the sash.
- Multi-point locking system provides a tight seal.
- Multiple lite configurations are available in a single mainframe.
- Combine casement and fixed lite windows to add striking beauty and increased visibility.

Caseмент windows combined with fixed picture windows let in a fresh breeze while keeping the weather out.

AWNING WINDOWS

The unique design of the awning window will impart a bold statement of high-end style to any room. Smooth operation is assured with a beautifully crafted low-profile handle opening the sash up and out.

- Exterior sash design creates the appearance of a larger glass area with an attractive slimline look.
- Heavy-duty hinge system provides easy operation from inside the home.
- Fully extruded overlapping screen frame offers convenient ventilation and keeps insects out.
- A dual locking system on each side of the window provides a tight seal.
- Multiple lite configurations available in a single mainframe.
- Combine awning windows and fixed lites for an expanded window design with refreshing airflow.

Add a distinctive touch of style to any room with an awning window.

PATIO DOORS

Classic-Style Sliding Patio Door

French-Style Sliding Patio Door

SLIDING PATIO DOORS

Get the most out of the spring and summer months with our masterfully crafted sliding patio doors – the perfect blend of beauty, durability and energy efficiency.

- Three distinctive styles: Classic, Contemporary and French.
- Mainframe and sash feature a double-wall design and multi-chambered construction for added strength.
- Dual internal/external weatherstripping on the sash enhances energy efficiency and performance.
- Steel reinforcements at the interlocks and lock rails increase strength and rigidity.
- Precision-engineered tandem roller system ensures easy and quiet door operation.
- Heavy-duty extruded aluminum screen features four adjustable rollers for smooth gliding.
- Available in 2-, 3- and 4-panel configurations.
- Choose from a variety of solid colors, hardware finishes and grid patterns to complement Bellevue Windows.

Add the perfect finishing touch to your patio door with one of our attractive handle selections. Classic and Contemporary door handles feature a popular thumb latch design. The French-style door handle is contoured and includes a top lock. Both are offered in seven interior finishes; exterior color choices are White, Almond, Desert Clay and Black.
